

Draft 9/18/12

Rev. 3 (Updated CAMD 2010 data)

Comparison of CAIR and CSAPR Annual NO_x Budgets

The attached spreadsheets compare state-level EGU annual NO_x budgets under the CAIR and CSAPR rules for both phases of these rules. CAIR remains in effect following the vacatur and remand to EPA of CSAPR. It is uncertain whether a replacement CSAPR rule could be fully implemented, including state SIP development, prior to the January 1, 2015, compliance date for CAIR Phase II.

The states included in this comparison are the states covered by both rules, to ensure data comparability. The data include actual 2010 EGU emissions and total state NO_x emissions for purposes of assessing the emissions and potential air quality differences – if any – between these two rules.

Regional comparisons for the included states also are provided to add a geographic perspective.

Key preliminary findings of this comparison are:

- The EGU NO_x budgets of the two rules are similar in the first phase (2012) and virtually identical in the second phase (2014 for CSAPR, 2015 for CAIR);
- CSAPR is 11% more stringent than CAIR in 2012, with a budget difference of 156,189 tons – 29% of this difference is in the CENRAP (central) region.
- The budget difference between the two programs in 2014/2015 is 8,368 tons in favor of CAIR (1,145,564 tons for CSAPR versus 1,137,196 tons for CAIR);
- In 2015, CAIR Phase II is more stringent than CSAPR in the Northeast OTC (7%) and Midwest LADCO states (4%), and less stringent in SESARM (-3%) and CENRAP states (-2%);
- As a percent of 2010 total state NO_x emissions, the differences between CAIR and CSAPR are negligible: in 2012, CSAPR reduces overall NO_x by the equivalent of an additional 1.6% relative to CAIR; in 2015, there is no meaningful difference between the two rules.
- Annual NO_x banked allowances under CAIR (entire CAIR region) increased by approximately 39,000 tons between 2010 and 2011, indicating that emissions were below applicable caps.

COMPARISON OF STATE EGU NO_x BUDGETS CSAPR AND CAIR AND TOTAL STATE NO_x FOR STATES COVERED BY BOTH CSAPR AND CAIR ANNUAL NO_x

State	2010	2010	CSAPR NO _x		CAIR NO _x	
	EGU NO _x *	State NO _x **	2012	2014	2009-14	2015

TOTAL	1,296,054	9,753,586	1,208,444	1,145,564	1,364,633	1,137,196

**OTC excludes VA, included in SESARM.

***LADCO includes MN.

TONNAGE DIFFERENCE CSAPR MINUS CAIR

Region	CSAPR - CAIR	
	2012	2014/15
OTC**	-18,501	11,218
SESARM	-43,369	-11,400
LADCO***	-49,178	12,588
CENRAP	-45,141	-4,038
TOTAL	-156,189	8,368

Note: Positive value means CAIR is more stringent than CSAPR.

CSAPR TONNAGE DIFFERENCE RELATIVE TO CAIR

Region	(CSAPR - CAIR)/CAIR	
	2012	2014/15
OTC	-10%	7%
SESARM	-9%	-3%
LADCO	-11%	4%
CENRAP	-17%	-2%
TOTAL	-11%	1%

Note: Positive value means CAIR is more stringent than CSAPR.

CSAPR TONNAGE DIFFERENCE AS PERCENT OF 2010 TOTAL STATE NOX

Region	CSAPR - CAIR	
	2012	2014/15
OTC	-1.1%	0.7%
SESARM	-1.6%	-0.4%
LADCO	-1.6%	0.4%
CENRAP	-1.9%	-0.2%
TOTAL	-1.6%	0.1%

Note: Positive value means CAIR is more stringent than CSAPR.

Sources: CAIR state budgets are from EPA Technical Support Document for CAIR (March 2005). CSAPR state budgets are from the final CSAPR rule, 76 FR 48208 (August 8, 2011), with state adjustments for NODA and other revisions provided by Jim Marchetti (August 2012). CAIR annual banked allowances are from EPA CAMD Air Markets Program Database (2012). Other sources are as noted above.
